Object : Recommendation Letter Noe GRACIA – fly4u

Sir, Madam,

I am pleased to write this letter of recommendation on behalf of Noe GRACIA, who had the opportunity to work as an apprentice within our team at fly4u (Toulouse, France) during the period of September 2022 to August 2023. Throughout this time, Noe displayed exceptional dedication and showcased immense potential in the field of artificial intelligence.

As an apprentice within our artificial intelligence team, Noe quickly grasped intricate concepts and demonstrated a deep passion for machine learning, data analysis, and related technologies. His ability to tackle complex problems and approach new challenges with enthusiasm was particularly impressive and the results of its works above our expectations.

Noteworthy accomplishments include the development of an airplane mode automatic detection solution to be integrated in our IoT devices. Noe had no issues to model the solution on computer and to integrate it in an embedded device based on Zephyr RTOS. Noe skillfully developed and applied advanced algorithms and AI models for processing and analyzing time series data, including sophisticated recurrent neural network techniques.

One of Noe's most admirable qualities is his capacity to collaborate effectively within the team. His clear communication and willingness to share ideas significantly contributed to our collaborative work environment. He also demonstrated a high level of autonomy in task execution, reflecting his professional maturity.

Moreover, Noe excelled in data analysis, programming, and transfer of knowledge.

As CTO, I was impressed by his dedication, intellectual curiosity, and constant desire to learn and improve. He remained open to new ideas and constructive feedback, which greatly contributed to his personal and professional growth throughout his apprenticeship.

I am sorry for not being able to hire Noe for budget reasons, but I am confident that he will continue to excel in all future endeavors he undertakes within the realm of artificial intelligence and fit perfectly with your team. He possesses both the technical skills and personal qualities necessary to succeed and make a significant contribution to any team.

I wholeheartedly recommend Noe for any future opportunity in the field of artificial intelligence. Please do not hesitate to contact me or Manuel BRACQ, his mentor ([mbr@fly4u.com](mailto:mbr@fly4u.com), +33(0)6.95.49.58.61) for any additional information.

Sincerely,

Mathieu AILLERIE
